* Modelo con bajo relieve engobado para rejuntar y que genera un aspecto final de mosaico sin fin. Las piezas se deben colocar sin separación entre ellas, para que todas las juntas queden con el mismo ancho cuando se rejunte. En caso de ir en una zona con salpicadura de agua deberá rejuntarse con mortero epoxídico para impedir posibles filtraciones a través de la junta.

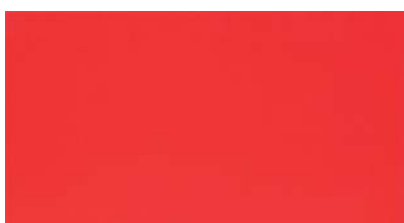

* Low relief model fully glazed with a layer of glaze over the hall surface of the piece in order to create an unending mosaic aspect. The pieces have to be laid without spaces between each other, that way all the joints will have the same width when re-grout. If the material will be applied in a wet place there should be used an epoxy adhesive in order to avoid filtration.
