**GSG**  
CERAMIC DESIGN

Imprimere personalità ed evocare suggestioni, sono prerogativa ricorrente, per la GSG Ceramic Design. La continua ricerca estetico-tecnica ha fatto sì che questa piccola azienda sia riuscita in poco tempo a imprimere nel mondo la sua immagine. Il risultato lo si deve allo sforzo congiunto tra innovazione formale e tradizione tecnica. Gli oggetti prodotti sono esclusivi e carichi di significati intellettuali e conducono il fruitore a scenari estetici inesplorati, delle piccole ma grandi opere aperte, la cui realizzazione, ottenuta mediante procedimenti eseguiti completamente a mano ne esalta il loro valore.

Showing personality and fascinating are two prerogatives of GSG Ceramic Design. For years our small-sized company has been developing and implementing innovative aesthetic and technical solutions consequently acquiring worldwide reputation. The result is a perfect blend of formal innovation and technical tradition. The items we propose are exclusive and original, unique and rich in intellectual worth, and smoothly lead users into unexplored aesthetic scenarios, small but great open works of art, in which the realization created through hand made procedures, exalt the beauty of the objects.

*Wc Touch, bidet Touch*

A close-up photograph of a white, modern, freestanding bathtub. The tub has a smooth, rounded, and slightly flared shape, typical of a freestanding model. It is positioned against a plain, light-colored wall, and the floor appears to be a light-colored tile or wood. The lighting is soft and even, highlighting the contours of the tub.

## Il nostro materiale Pietraluce®

Si tratta di un composto di allumina idrata, biossido di titanio e resina poliestere, rivestito di uno spesso strato di resina ISO-NPG che conferisce brillantezza, resistenza, impermeabilità e caratteristiche anticalcaree. Pietraluce® è resistente agli acidi, ai solventi e alle sostanze liquide usate per la pulizia; ha proprietà antibatteriche, è infiammabile ed autoestinguente.

Graffi o macchie di sigaretta possono essere asportati con una normale pasta lucidante. Piccole riparazioni di scheggiature o incisioni profonde possono essere effettuate usando il nostro kit di manutenzione.

Pietraluce® si può tagliare e forare con normali utensili in acciaio.

## Scheda tecnica materiale Pietraluce®

I risultati delle prove di laboratorio.

Pietraluce® è un composto di allumina idrata, biossido di titanio e resina poliestere.

Densità:

1,8 g/cm<sup>3</sup> ca.

Assorbimento acqua:

Gel-Coat 0,17% ASTM D 570, manufatto inferiore allo 0,75%.

Resistenza allo shock termico:

inalterato dopo 25 cicli da -20°C a +80°C

Risultati del Laboratorio Prove Materie Plastiche dell'Istituto di Chimica Industriale "Giulio Natta" Politecnico - Milano.

Certificato N° 48/80 del 18.12.1980

Prof. Dante Pagani.

1) Resistenza all'abrasione (NEMA LD 3-1975):  
è superiore a 2000 cicli.

2) Resistenza all'alta temperatura (NEMA LD 3-1975):  
il recipiente, contenente cera fusa a 180° C, provoca leggere variazioni del colore sulla superficie.

3) Resistenza alla macchia (ANSI Z 124.1-1974):  
dopo 14 ore sono facilmente asportabili macchie di: lucido da scarpe nero, inchiostro lavabile blu, rossetto per labbra, salsa di pomodoro, caffè. Tintura nera per capelli e soluzione alcolica di iodio 1% sono eliminabili dopo 20 minuti.

4) Resistenza chimica (ANSI Z 124.1-1974):  
dopo 14 ore non lasciano segni visibili: alcool etilico, acido citrico 10%, urea 6,6%, acqua ossigenata 3%, ipoclorito e acetone.  
La benzina super lascia un'impronta visibile se non è asportata entro 20 minuti.

5) Resistenza al lavaggio (ASTM D 2486):  
20000 cicli mediante una spazzola di nylon ed una soluzione al 5% di detergente liquido commerciale lasciano tracce leggere.

6) Resistenza all'invecchiamento artificiale:  
dopo 200 ore di esposizione ad una lampada UV da 300W non si notano alterazioni delle superfici.

7) Resistenza alla scalfitura:  
il carico necessario con "Taber" con punta di diamante è 190 g.

Certificato N° 252/1982 del 6.7.1982 Prof. Dante Pagani.

1) Resistenza all'infiammabilità (ASTM D 635):  
i campioni risultano autoestinguenti.  
La fiamma si spegne prima di raggiungere il primo segno di riferimento.

## Our material Pietraluce®

*It is a compound of hydrated alumina, titanium dioxide and polyester resin, covered by a thick layer of resin ISO-NPG which grants shine, resistance, impermeability and anti-scale features.*

*Pietraluce® is resistant to acids, solvents and to liquid cleaning products; it has anti-bacterial properties, it is non-flammable and self-extinguishing.*

*Scratches or stains of cigarette can be removed by a normal polishing paste. Small repairs of chippings or deep cuts can be done by using our maintenance kit. Pietraluce® can be cut and drilled with normal steel tools.*

## Technical sheet material Pietraluce®

The laboratory test results.

Pietraluce® is a compound of hydrated alumina, titanium dioxide and polyester resin.

Density:

1,8 g/cm<sup>3</sup> approx.

Water absorption:

0,17% Gel-Coat, ASTM D 570,  
manufactured article less than 0,75%.

Thermal shock resistance:

Unchanged after 25 cycles from -20°C to +80°C.

Results from tests performed by the Plastics Testing Laboratory  
"Giulio Natta" Institute of Industrial Chemistry - Polytechnic - Milan.

Certificate N° 48/80 of 18.12.1980

Prof. Dante Pagani.

1) Abrasion resistance (NEMA LD 3-1975):  
is above 2000 cycles.

2) High temperature resistance (NEMA LD 3-1975):  
the container, containing molten wax at 180° C, causes slight colour variations on the surface.

3) Staining resistance (ANSI Z 124.1-1974):  
after 14 hrs. following spots are easily removed: black shoe polish, blue wasable ink, lipstick, tomato sauce, coffee.  
Black hair dye and 1% iodine alcoholic solution are removed after 20 minutes.

4) Chemical resistance (ANSI Z 124.1-1974):  
after a lapse of 14 hrs. the following chemicals do not leave any visible sign: ethyl alcohol, 10% citric acid, 6,6% urea, 3% hydrogen peroxide, hypochlorite and acetone.  
The high octane gasoline leaves a visible trace unless it is removed within 20 minutes.

5) Resistance to washing (ASTM D 2486):  
20000 cycles with a nylon brush and a 5% commercial solution of a liquid cleansing agent leave slight traces.

6) Resistance to accelerated ageing:  
after 200 hrs. exposure to a 300W UV lamp there are no surface alterations.

7) Scratch resistance:  
the charge requested for scratching with "Taber" with diamond point is 190 g.

Certificate N° 252/1982 of 6.7.1982

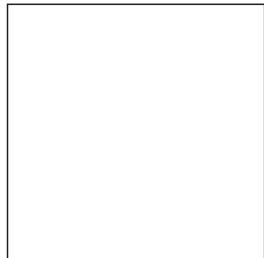

Prof. Dante Pagani.

1) Inflammability resistance (ASTM D 635):  
samples are self-extinguishing.

The flame is extinguished before the first reference mark.

## MASSIMILIANO ABATI DESIGNER

Civita Castellana 1975. Formazione artistica e studi di architettura presso la Sapienza di Roma. Collabora sin da giovanissimo, come consulente di comunicazione visiva e percettiva nelle scuole primarie, dove la stretta vicinanza con il "FARE" dell'infanzia, non fanno perdere traccia dei metodi ludici indispensabili nel mestiere di creatore di spazi e di oggetti. Nel 1998 entra come collaboratore presso lo studio di architettura Portoghesi, dove si forma come ricercatore di codici stilistici, ma soprattutto impara a dare spessore alle idee. Nel 2003 intraprende la libera professione e collabora con alcune agenzie di moda e dello spettacolo occupandosi di scenografia e location, con alcune escursioni nel mondo del teatro. Per GSG ceramic design, 2004/09 disegna alcuni concept bath di forte impatto emotivo. Attualmente cura la direzione artistica di alcune aziende, e si occupa di design e comunicazione.

**BOING** Il set è costituito da sei tipologie di lavabi disponibili in tre misure, tre free standing, tre back to wall, nelle misure: 60 80 105 cm, e di una colonna collocabile su tutte le versioni della gamma. I sanitari sono previsti nella versione sospesa, terra, e con cassettoni ceramico. La personalizzazione dei prodotti si presta in particolar modo, sia nei colori disponibili per la ceramica, sia per la disponibilità di mobili laccati in varie cromie ed essenze lignee. Le ante scorrevoli in materiale traslucido colorato, danno un ulteriore nota caratterizzante. E' un concept-bath rivolto ad ogni tipo di esigenza. Il metodo usato per ottenere "boing" è stato quello di pulire una forma di provenienza classica, e di applicarne le innovazioni formali finora raggiunte. Il risultato è un prodotto flessibile ad ogni campo applicativo.

**TOUCH** è forma a servizio dell'acqua, modellata dall'acqua, fornita all'uomo come oggetto poetico: per chi cerca significati nelle forme, touch diventa oggetto di divenire, sempre coerente al passaggio del tempo, mai stanco di servire il corpo e la mente. È la ricerca della naturalezza, il movimento delle forme, la mai stanca volontà di circondarsi di forme regalate dalla natura che diventa archetipo, un modus vivendi diventato l'unica via per vivere in un'esatta coerenza. Il gesto plastico che ricorre su tutta la gamma, è quello di creare quasi a livello manuale, una sede per accogliere l'acqua e modellare la materia per servirsene in maniera non traumatica: tutto ciò conferisce agli oggetti un'artigianalità d'altri tempi che esula dalle forme altamente industrializzate di cui ci siamo circondati. Il messaggio quindi è quello della riscoperta di oggetti che possono superare la sfida del tempo attraverso una riacquisita onestà delle forme e della loro destinazione d'uso.

**OZ** è un concetto, è l'assimilazione e al tempo stesso l'indifferenza verso i canoni e ai codici. "SCAVARE", è l'azione che ha mosso lo spirito formale: segni impressi nella materia che costituiscono le radici del tempo e della tradizione. L'intenzione formale era quella di racchiudere questi concetti in un oggetto; destrutturare il pensiero e la forma plastica, in un risultato di assoluto equilibrio. I "graffi" impressi nella materia sono gesti di rottura e di una certa violenza, ma anche benevoli, perché si ricompattano per uno scopo specifico: quello di accogliere l'acqua e farla defluire nuovamente nella materia. L'invito a chi sceglie questo concept set è quello di parlarne come si argomenta su un'opera d'arte, perché oltre ad assolvere alle sue funzioni precise, è avanguardia. Una piccola digressione intellettuale calata in una realtà, quella del bagno, diventata nobile per una scelta che muove il pensiero.

**GLASS** L'abolizione totale degli spigoli, identifica questo concept, spingendolo oltre il significato estetico-formale. L'ergonomia, è cercata nelle sue forme più naturali. Guscio esterno e fuoriuscita dell'acqua, dettano la partenza e la fine della forma, rendendola coerente al materiale, quindi organica. Unico esempio del suo genere, si correderà oltre che della linea completa sanitari-lavabi-vasca, di un gruppo rubinetteria in ceramica, lavabo, bidet, vasca; esperimento finora inesplorato, di fortissimo interesse tecnico estetico.

**BOX** Lavabi in Crystal-tech dalle linee minimali adatti ad ambienti contemporanei. Ceramic disponibile in 6 colori: i lavabi sono collocabili su mobili o panche; si prestano per le varietà dimensionali a tutte le esigenze di spazio. Completano il nuovo concept bath di GSG Ceramic Design, la linea di mobili sospesi correddati da intriganti texture, che aggiungono all'intera composizione, un tocco di arte e di eleganza.

**WASHWAVE** Oggetto fluido e leggero. Una piega lieve, simile ad un'onda, raggiunge il lavabo formando un'unica sezione. Due elementi distinti, ma in simbiosi formale. Il lavabo e l'onda, quest'ultima utilizzabile come piano o specchiera. GSG ceramic design, esplora i limiti tecnici della ceramica, interpretando la "materia" in chiave ironica e romantica evocando ancora una nuova suggestione.

Civita Castellana 1975. Artistic background and architectural studies made at Sapienza university in Rome. Since he was younger he collaborated as visual communication teacher at primary school where, living in touch with the childhood, he could learn some playful methods he began to use his creations of spaces and objects. In 1998 he became a Portoghesi's collaborator; in this office he worked about research on stylistic codes and above all he learnt to give shape to ideas. In 2003 he began a freelance activity and collaborated with some fashion and show agencies working on scenery and location, with some experiences in the world theater. For GSG Ceramic Design, 2004/09 he designed some bath concept with a strong emotive impact. At the moment he is the art director of some firms and works on design and communication.

**BOING** The set is composed of six types of washbasins in three different sizes; three back to wall and three free standing basins measuring cm. 60 - 80 and 105, and one column that may be used for all versions of the range. The sanitaryware are produced in wall-hung, back to wall versions, with a ceramic column cistern. Customization of products is available for both colours of ceramics, and is also for lacquered furniture in wood and various colours. Sliding doors are made of translucent colours giving a note of character. A concept for bathrooms for all needs. The method used to obtain "Boing" was to purify a classical design, and apply innovations to the new form. The result is a flexible product for every necessity and desire.

**TOUCH** Offered to man in the form of a poetical object: for those who look for significance in shapes, Touch becomes an ever-changing object, always consistent with the passing of time and ready to serve body and mind. It is a search for naturalness, the movement of shapes, the desire to surround oneself with shapes offered by Nature that becomes an archetype, it is a modus vivendi, the only way of living in absolute consistent harmony. The plastic gesture characterising the whole set is the almost manual moulding of a place to house water and shape matter in order to reuse it in a non traumatic way. Objects thus take on an old-fashioned craftsmanlike value which has nothing in common with industrialized shapes we are usually surrounded by.

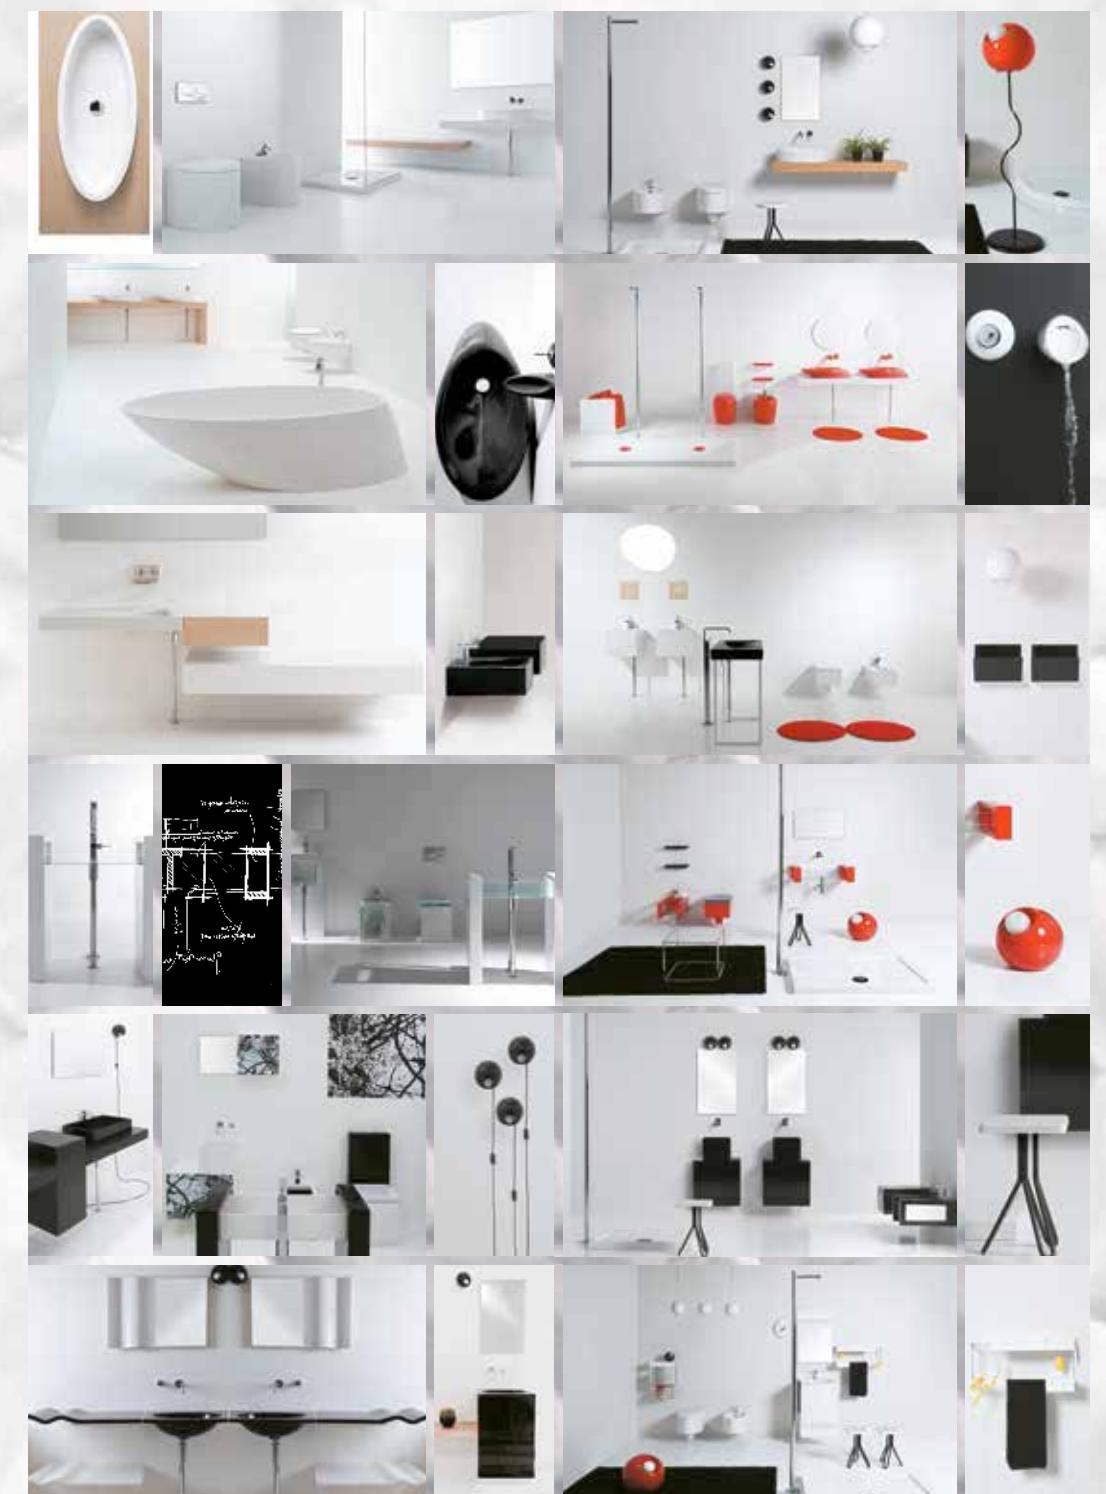

**OZ** is a concept, it is assimilation and at the same time indifference towards standards and codes. "Digging" is the action that has thrust forward the formal spirit: marks impressed onto matter that make up the roots of time and tradition. The "scratches" left on matter are violent as well as benign breaking gestures all serving a specific purpose: receiving water and making it flow back into matter. Those who choose this concept set are invited to discuss it as one usually does with a work of art, since it serves its specific functions in an avant-gardist way, being a slight intellectual digression into the bathroom setting that thus becomes noble by virtue of choices that are real food for thoughts.

**GLASS** Lightness, innovation consistency, cleanliness, are prerogatives contained within the new concept of the GSG ceramic Design. The extreme formal linearity of glass, creates a shell for water connecting the ceramic forms which support the elements in crystal. It is a strong architectural concept: emptiness and transparent overlaps conjointly with supporting ceramic elements, giving one the sensation of intangibility. Crystal evokes faint reflections, always indefinite; ceramic supports the power of gravity creating detectable limits.

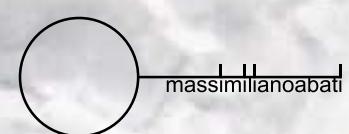

**BOX** Washbasins in crystal-tech, minimal design, adapt for contemporary living. Available in 12 colours and easily fitted on cabinets and styled benches. The variety of dimensions make them suitable for every space. They complete The New Concept Bath by GSG Ceramic Design, enhancing the wall hung cabinets furnished with intriguing texture which adds to the entire composition a touch of art and elegance.

**WASHWAVE** light and flowing article. A slight wave like bend reaches the sink forming a single section. Two distinct elements, but in formal harmony. The sink and the wave, the latter used as a top or a wall mirror. GSG Ceramic Design, explores the limits of technical ceramics, with great formal coherence; Massimiliano Abati interprets the "matter" in an ironic and romantic way, evoking even a new suggestion.
